CHAIN of Protection, a medical website on vaccination and immunisation by the Children’s Hospital at Westmead, was launched recently. The website, at www.chainofprotection.org, contains information and resources for both health professionals and the general community. Chain of Protection features a series of engaging videos as the centrepiece. Topics include Chain of Protection, Herd Immunity, Disease Prevention as well as videos on killer diseases such as meningococcal disease and whooping cough, where families tell their stories. Information is available on vaccination, the immunisation schedule, boosters and vaccination for travel with access to fact sheets as well as links to a wide range of further information including managing vaccine safety and reporting on adverse reactions.
